

EXPERT TIPS:

Rapid Multi Surface Disinfectant Cleaner

VERSATILE
4-IN-1
DISINFECTANT
CLEANER

Simplify procedures with one product across multiple spaces and surfaces.

Speed up cleaning by reducing steps and achieving quick disinfection!

Promote cleanliness, health and positive user experience.

ELIMINATING RESIDUE AND STREAKS:

EPA Reg. No. 1677-272

Use a clean microfiber cloth for best performance, as paper towels (or other disposable wipes) may leave behind particles or residue.

Do not use fabric softener when cleaning microfiber cloths.

For mirror and glass application, **spray clean microfiber cloth instead of the mirror** for a streak-free finish.

FIGHTING GERMS AND ODORS ON SOFT SURFACES:

Sanitizes, disinfects and removes odors, but is not a stain remover.

Before using on soft surfaces, test the product in an inconspicuous area. Avoid using on white, light-colored or cotton fabrics.

ACHIEVING THE BEST RESULTS:

USE ON MULTIPLE SURFACES ACROSS OPERATION

PUBLIC SPACES

including windows, glass and high-touch surfaces

RESTROOMS

including mirrors, fixtures and sinks

SOFT-SURFACE DISINFECTION

including upholstered furniture

HIGH-TOUCH HARD SURFACES

⚠️ WAIT BEFORE YOU WIPE

Surfaces must stay wet for the full contact time to achieve disinfection and kill pathogens that make people sick.

⚠️ FOCUS ON GERM HOT SPOTS

High-touch surfaces are more likely to harbor germs that may make people sick. Prioritize disinfection of these surfaces.

* 10 second kill time for SARS-CoV-2 and 30 second kill time for Norovirus, Influenza A virus and common cold virus when used according to label directions. EPA Reg. No. 1677-272.
